

**EnergyNet Internet  
Installation Release Form**

To whom it may concern:

Your tenant, \_\_\_\_\_, located at \_\_\_\_\_ has requested installation of EnergyNet's wireless internet service. To provide adequate service to this location will require the use of an externally mounted antenna. It is always our goal to mount the antenna as inconspicuously as possible while still attaining proper signal strength. At least one small 1/4" hole may need to be drilled to pass the antenna cable through the structure to the interior of the premises. Two other small holes may need to be drilled to mount the antenna to the structure.

Before proceeding with the installation, we wanted to inform you of our intentions and ask your permission to perform this work. We would be willing to meet you at the premises to discuss our plan for performing this installation. To discuss the installation or schedule an appointment at the premises to review the installation plan, please call us at 270-887-0762.

Sincerely,

EnergyNet

---

**I hereby grant permission for the above installation:**

Name \_\_\_\_\_  Owner  Property Manager

Property Address \_\_\_\_\_

Signature \_\_\_\_\_ Date \_\_\_\_\_

Daytime phone number (in case installer needs to reach you) \_\_\_\_\_
